REST API	JSON	Jest

API Integrations

Razorpay Payment Gateway

SMS Gateway Hub

ABOUT ME

Self-taught developer passionate about solving problems with top-notch web technologies. Specialized in web development, constantly learning and staying updated with the latest advancements. Creative problem solver, dedicated to delivering exceptional results.

PROJECTS

- **TIKK TAP**

Feature-Rich Portal for Managing Digital Visiting Cards with NFC Technology.
Developed and implemented an e-commerce solution for selling digital visiting cards and contact-sharing tags. Seamlessly integrated e-commerce and contact-sharing functionalities with a user-friendly interface. Utilized **React, Node.js**, and **MongoDB** to ensure scalability and performance. Deployed API on **AWS EC2** and front-end on **AWS Amplify** for optimal performance and availability.
Key Functionalities: Online Payment Integration - Razorpay, SMS Gateway Integration, Performance Reports and Charts, Dashboard, Responsive Design, JWT Authentication, **Redux, OTP Login**.

- **Pulze**

An Admin Portal for Managing Products, Users, and Orders Seamlessly.
A dynamic admin panel, is deployed on AWS Amplify and EC2 for scalability and reliability. Leveraging JWT for secure authentication and Redux for streamlined state management, it offers robust functionality. **Administrators can effortlessly manage products, users, and orders**, while also accessing insightful **charts and analytics** for data-driven decision-making. With seamless integration of AWS services, Pulze provides a secure, scalable, and user-friendly environment for efficient online operations, empowering administrators to stay in control and optimize their business processes.
